

A new way to offer voluntary dental cover

With Unum Dental, you could add dental cover to your benefits package at no cost to your business with our fast, simple, online enrolment portal*.

How does the enrolment portal work?

1

We'll provide you with a unique 'enrolment code' and URL which you can include in your benefit communications to confirm the enrolment window is open. Use our [dental communications toolkit](#) to help with maximum engagement during the window.

2

Employees will use the unique code to access the portal to find out more about the cover and apply. Following a simple registration process, employees will get instant access to our online claims portal, providing a complete end to end online journey from joining to claiming.

3

From day one of your policy, members will be able to claim towards the cost of routine and essential dental treatment at a dentist of their choice, worldwide – up to the limits shown on the benefit schedule.

Choose either salary deduct or individual direct debit options.

If selecting the individual direct debit payment option, please note the benefit window will close two weeks before the policy start date. This allows us to send you a list confirming all joining members and ensure all direct debits have been set up correctly. If you choose salary deduct, we'll work with you to decide the best time to close the enrolment window.

* New joiners to Unum Dental only. New employees to the company will have 30 days from their start date to apply.

If you have any questions about our new portal and how it can benefit you, please contact your Unum Dental representative.
